

My company has distribution facilities all over Florida. I travel 4 markets, Miami, Orlando, Tampa and Jacksonville. XM Radio not only makes these trips more tollerable with continuous coverage without searching for stations, but also safer with the new traffic and weather reports. I have NEVER BEFORE been able to figure out how to get dependable local traffic information when I am outside my home area. As an asside, I am also more informed thanks to the news channels; FOX, CNN and others.
